Education

UX Design Certificate Google, Coursera

A hands-on certificate program that teaches the design process from end-to-end.

HTML Certificate (Professional Level) W3Schools

Certification demonstrating expertise in semantic markup, responsive design principles, and industry best practices essential for modern web development.

Experience

UI/UX Design - 2 years

Designed a full-scale carpool app with safety features and social interactions. Led the entire design process—from research and wire-framing to prototyping and testing—focusing on secure authentication, usability and in-app messaging. Balanced usability, accessibility, and aesthetics to create a user-centered experience.

Figma - 2 years

Mastered wireframes, prototypes, animations, and auto-layouts through hands-on experience. Proficient in design systems, component libraries, and collaborative workflows for usability testing and presentations.

Front-end Development - 1 year

Designed, created and coded my personal website from scratch using HTML and CSS.

Skills

Figma

- Proficient in creating wireframes, interactive prototypes, and animations
- Skilled in using auto-layouts for scalable, responsive designs
- Experienced with managing design systems and component libraries

Front End Development

- Foundational knowledge of HTML and CSS
- Familiar with building responsive, mobile-friendly layouts
- Experience with version control using git and GitHub
- Solid understanding of web accessibility standards and best practices
